

Web.Client for PRO.FILE

On all devices

Smartphone
Tablet
PC

Work with your team on the go,
on any device

Access documents on the web
without pre-installation

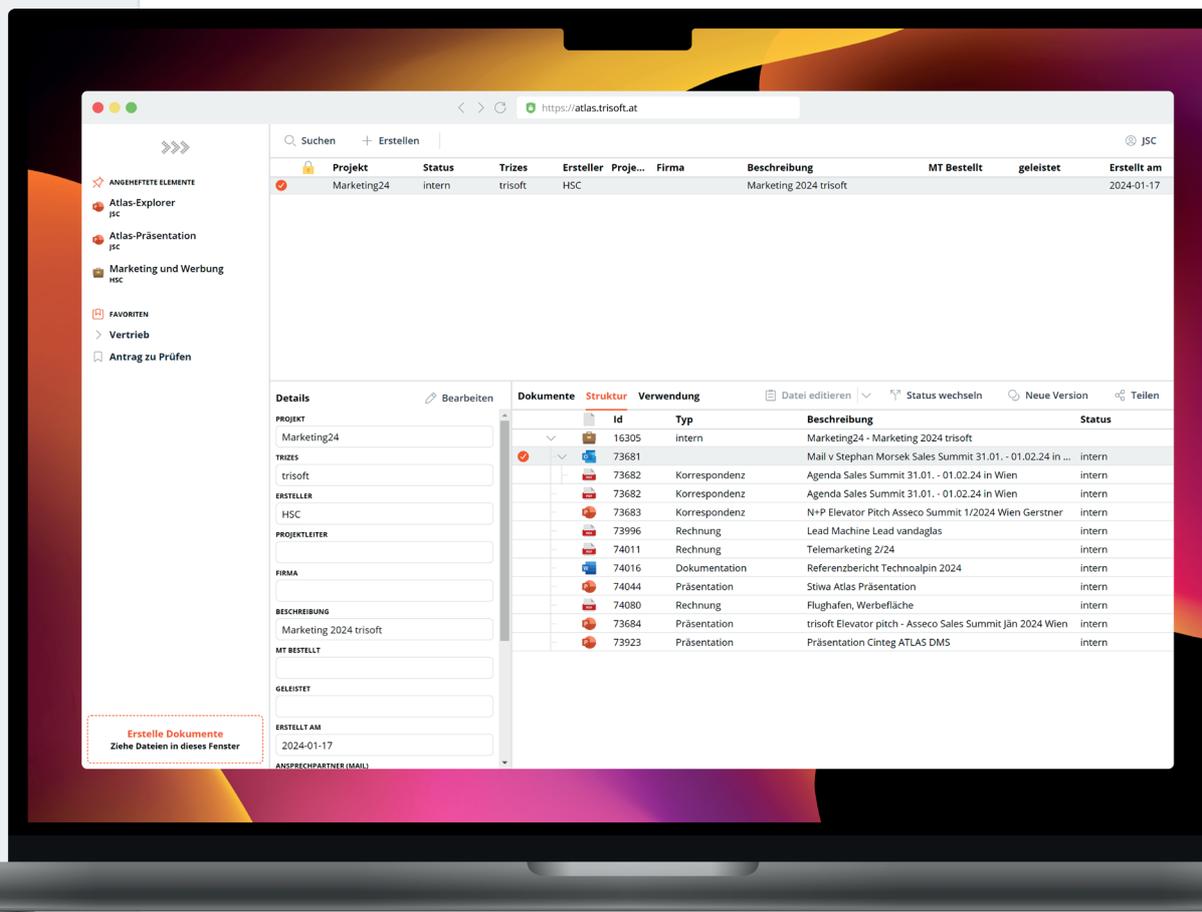

Regardless of the
operating system

Windows
macOS
Linux

Just before takeoff, on the production floor, or at a client's office - there are countless moments when accessing your documents isn't possible or isn't easy.

PRO.FILE documents are now available to you anytime, anywhere - with numerous features that make it easier for you to work even while on the go.

This keeps you flexible and independent, allowing you to organize your daily work more efficiently.

Atlas Features

Search

Find what you're looking for even faster! Using metadata such as name - or parts of the name - document type, project, date, and the quick preview, you can find your documents, projects, or parts in a simple and straightforward way.

Upload

Need to quickly check in a document you just received via email while on the go? Or create a new document? Thanks to metadata classification, your documents can be found anytime, anywhere.

Download

You can download your documents on the go and continue working

Work quickly - alone or in a team

Teamwork

Need to collaborate? Work on a document (e.g., an Excel sheet from Office 365) simultaneously with your colleagues.

Notify

Share links to documents, projects, item lists, and all other objects

Change status

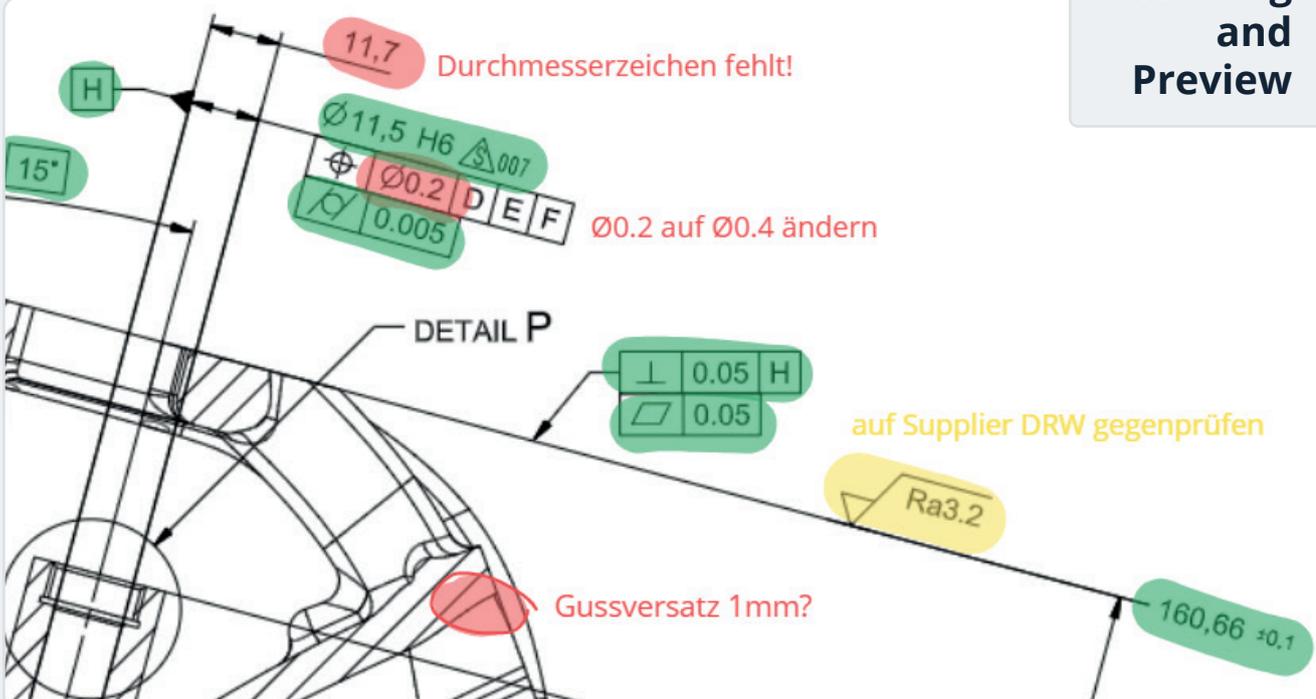

Need to quickly share a document or share a document while on the go? With Atlas, you can change the status of your documents at any time.

Redlining Preview

Get a quick overview with the preview. With the redlining feature, you can mark up documents, add comments, draw on them, and overlay this information in multiple layers.

Redlining and Preview

User-friendly work environment

Cross-application
Windows

With floating tabs, you can work across multiple screens and edit your objects.

Intuitive
interface

Thanks to the intuitive layout, new users can quickly find their way

Structures and
links

The structural view makes it clear which objects are related to which others. Links can be set on the go.

Quick navigation
thanks to an intuitive
user interface

Manage approvals
on the go

Manage
folders

Organize your system and easily manage your folders on the go. You can create and collect specific documents anywhere. You can also search for folders, provided you have the necessary permissions in PRO.FILE.

Languages

Habla Español? Pricate li hrvatski jezik? The user interface is available in German and English by default and can be translated into any other language.

Desktop and
on the go

You can work from anywhere - on your PC and with your mobile devices such as a tablet or smartphone.

Digital Signature

Sign documents flexibly on the go - whether on a smartphone, tablet, or computer, whichever suits your needs. Legal compliance is, of course, guaranteed. The security of your signature is ensured by digital certificates and ISO 27001:2013 compliance.

Context-sensitive Menus

Users are shown only relevant commands and actions, ensuring a clear user interface and efficient operation of Atlas. Unnecessary options remain hidden.

API and ERP integrations

Powerful API and ERP integrations enable seamless integration into existing enterprise systems. For example, documents can be automatically archived from the ERP system, metadata synchronized, or workflows initiated across systems - for end-to-end digital business processes without media breaks.
